## PROFILE

Senior Full-Stack Engineer with 4+ years of commercial experience building products end-to-end — from architecture and APIs to interfaces, mobile clients and production infrastructure. Co-founder of Orvantis Labs, where I lead engineering of B2B platforms, real-time systems and AI integrations. I care about shipping: clear architecture, readable code and features that move business metrics.

## EXPERIENCE

### Co-Founder / Lead Full-Stack Engineer · Orvantis Labs — Jun 2026 – Present

- Designed and built **Orvantis Labs Office** — cloud CRM/ERP for certification bodies: email-to-application intake (IMAP/SMTP), automatic PDF data extraction, registration journals, company deduplication, team chat, leads funnel and a management dashboard.
- Stack: React 19 + TanStack Start/Router/Query, Node.js + Express 5 + TypeScript, PostgreSQL + Prisma, WebSocket, Service Worker web-push.
- Built a NestJS + MongoDB backend with Bull queues, Socket.io, Swagger and Kubernetes manifests for a navigation/logistics product.
- Developed a Go authentication service (clean architecture, SQL migrations, third-party identity integration).
- Own infrastructure and releases: Linux servers, nginx, systemd, Docker, CI/CD; shipped Telegram bots and the company website (SSR).

### Full-Stack Developer · D2D Studio — Jan 2024 – Present

- Built and maintained the backend of a real-time multiplayer card game (Node.js, game state machine, rating system, admin portal) integrated with a Unity iOS client.
- Developed QARP Academy — online learning platform: NestJS backend, React frontend, subscriptions and payments, EN/RU deployments.
- Built AI products: Telegram voice assistant (Whisper + GPT + TTS), HR recruiting bot, AI Chrome extension for Google Meet / Yandex Telemost.
- Data pipelines on Apache Airflow + Redis; grew from Middle to Senior, owning features from architecture to deployment.

### Backend Developer · PRODVIG — 2023

- Python backend services (FastAPI, Django) for CRM and client management; REST APIs and ORM data models.
- Integrated third-party APIs and payment gateways; covered APIs with unit and integration tests (pytest).

### Junior Developer · Paloma365 — 2022

- Backend development: API routes, request processing, integrations and network data visualization.

## SKILLS

**Backend**
Node.js · NestJS · Express · Go · Python · FastAPI · Django · REST · WebSocket · Microservices

**Frontend & Mobile**
TypeScript · React · TanStack · Next.js · Tailwind · Swift · React Native · Unity

**Data**
PostgreSQL · Prisma · MongoDB · Redis · Airflow

**DevOps**
Docker · Kubernetes · nginx · CI/CD · Linux

**AI**
OpenAI API · Whisper · TTS · Telegram bots

## EDUCATION

**Satbayev University**
B.Eng., Computer Science
2023 – 2027

## LANGUAGES

Russian — native
Kazakh — native
English — advanced

## BEYOND CODE

Former water polo player — discipline and teamwork in fast-paced teams.
